13 March 1950

Confusion ends with sale of national Hooperatings

Confusion era of national radio and TV ratings appears over now that Nielsen has acquired national Hooperatings. Lines now firmly drawn in broadcast measurement field with Nielsen national authority and Hooper confining activities to local level from which he has been deriving some two-thirds of his revenue. Diminishing radio network market reported to be basic reason for Hooper's exit. Hooper feels that future of audience measurement is in TV though his national TV ratings have also been sold to Nielsen. National Hooperating subscribers numbering about 100 will receive Nielsen service after brief transition period.

-SR-

Kaiser-Fraser launches vigorous spot drive

Latest Kaiser-Fraser cars were given good kickoff to New York buyers with high-powered spot campaign on seven AM stations and three TV outlets. In all, William Weintraub & Company, K-F agency, placed 118 radio and 29 TV announcements—a forerunner of similar campaigns in other cities when new models are displayed.

-SR-

Interest in spot continues at record pace Spot enjoyed record month in January; trend continues. Borden Co.'s plan to use extensive spot campaign in 80 markets through Young & Rubican is new indicator of advantages spot offers certain kind of advertisers. In case of Borden, its <u>County Fair</u> network show, which will be allowed to expire April, achieved purpose sought nationally. That purpose was brand-name recognition. The flexibility of spot will enable it to combat competitive factors as they arise. Since Borden Co. is not a national advertiser in the sense that General Motors or General Foods are, company feels that spot will better serve its hard, down-to-earth sales needs.

-SR-

\$100,000 for Army recruiting drive

That's only the spot figure that has been allocated for use in 52 key cities to advance the Army reserve program. Close to 40 percent of the Army-Air Force recruiting budget is earmarked for radio and TV (about \$636,000). Broadcast Advertising Bureau and correspondence from station management have served to make Army aware of radio's advertising potential. (See SPONSOR 27 February, page 8.)

-SR-

Family income on rise

Eight million families had incomes over \$5,000 in 1948, according to Census Bureau income study. Ten million families had incomes under \$2,000. About half of latter families were headed by farmers or laborers. Buying power of farm families is understated, however, since report covers only cash income, Census release warned. Median income of U. S. families was \$3,200, an increase of \$150 over 1927. In the over \$5,000 bracket, more than a third of the families were headed by professional or semi-professional workers, proprietors, managers, or officials. Complete details are given in Census Bureau's "Current Population Report", No. 6.

REPORTS...SPONSOR REPORTS...SPONSOR R

business booming

Transit radio More national business signed on transit radio in past two months than during entire previous 14 months of its national sales activity. Manhattan Soap, through Duane Jones, has signed for six transit markets starting in mid-April. Other recent national accounts include General Foods for Birdseye frozen foods through Young & Rubicam; Bower & Black for Blue Jay through Henri, Hurst & McDonald and Seeck & Kade Inc. for Pertussin through Erwin, Wasey Inc. Latest additions to transit radio markets are Minneapolis and St. Paul.

-SR-

Report on TV network sponsor mortality

Of 37 national advertisers on television networks in 1948, 14 continue on the air today, according to Rorabaugh Reports on television advertising. Two of these are CBS-TV's Ford and Lipton accounts and following going strong on NBC-TV: Chevrolet, Colgate, Firestone, General Foods, Gillette, Texas Co., Kraft, Liggett & Myers, Philco, Procter & Gamble, RCA and R. J. Reynolds Co.

General Foods steps up its ad campaign

General Foods has announced plans to expand its advertising in the major media including radio and TV; Minute Rice, Birdseye Frozen Orange Juice, the Swans Down Mixes, Maxwell House Tea and some of Post cereals expected to come in for extra-heavy advertising promotion.

-SR-

TV accounts decline in January, up in February

Number of TV accounts in two categories showed a decline in January over preceding month. This can be attributed to Christmas business which saw many TV outlets breaking new records. Network TV showed gain with 93 accounts against 89. Spot accounts declined from 427 in December to 399 in January while local retail accounts totaled 1,687 in January against 1,800 in December. Increased activity reported in February.

-SR-

Radio listening continues in TV homes

In their eagerness to find out what's happening to radio listening when television enters a market, agencies and advertisers have all but overlooked a very important fact. To wit, a good deal of radio listening goes on simultaneously with TV viewing. In a current report (The Television Audience of Today-No. 12) Advertest Research reveals that in 10.8 percent of radio-TV homes in the New York market both radio and television sets are in use between 9-9:30 p.m. Monday through Friday. Between 11-11:30 p.m. the drop is only slight, to 9.9 percent. Peak of simultaneous use of radio and TV sets comes earlier on Saturday and Sunday, with 16.3 percent and 15.6 percent for the first and second half hours. The survey was made the first week in February with a sample of 546 television homes distributed in New York's five boroughs and ten counties of Northern New Jersey. Radio listening in TV homes is coming back strong between hours of 4 and 7 pm when kiddies are monopolizing TV viewing of puppet shows and cowboy thrillers. Mama and Papa are resorting to radio to renew their acquaintance with such adult fare as soap operas, music, news.

Radio audience increase indicated for late afternoon, early evening hours

Audience measurement surveys now being made will show listenership on the increase for radio's late afternoon, early evening shows. With Junior monopolizing the TV, moniand dad are turning to their radio sets for adult fare.

Negro market a replacement for foreign language audience

Big city stations can look for the Negro andience to replace the foreign language audience should need arise. Americanization of foreign born listeners; their gradual assimilation; lack of interest amongst second and third generation Americans to Old World folkways may mean a decline in foreign language listeners. Commercials and programs slanted to the Negro market ("The Forgotten 15,000,000." 24 October sponsor) could replace a declining foreign language group.

Papaya juice to vie with frozen juice concentrates

Frozen orange juice has boomed with the aid of spot radio: sales are high for Minute Maid. Hi-V. and Snow Crop. Now, frozen papaya juice is due to get into the act. Two Hawaii businessmen are turning out a thousand cases a day: the two men expect to flood the mainland with the nectar by this spring. Look for a radio campaign to start shortly.

Auto manufacturers may plug trucks instead of passenger cars

The big auto makers (Ford, General Motors, Chrysler Corporation, Hudson) have used spot radio effectively to spur 1950 ear sales. Now they may give some of the air time over to hypoing truck sales. Although Chevrolet, Ford and Dodge report their best January truck sales in history, the industry generally believes it will sell fewer trucks this year than last. Price cuts, automotive changes, and increased heavy model ads may be the solution.

Home builders may set record for 1950 construction

Ground was broken for 80,000 houses and apartment dwelling units this past January—30,000 more than in January, 1949 and 1950 looks like a record year. While trying to lower building material costs, construction men are using radio to appeal to the mass market. Among the users of spot radio was the Levittown development. Now, Mastic Acres Incorporated, another Long Island project, is turning to radio and TV spots with a \$200,000 budget. Home builders throughout the nation will follow suit.

NAB, foreign language stations to aid the census taker

More than 200 foreign language stations throughout the country will help the census taker on 1 April. Spots and five-minute features are being prepared for distribution to these stations by the NAB Foreign Language sub-committee to help the new citizen understand the first census in ten years. Community leaders will read foreign language scripts which ask listeners to welcome the census taker as a friend. Among the New York stations participating will be WOV, WBNX, WWRL, WLIB and WHOM.

Anti-histamine ad barrage may lag this spring

The antihistamine manufacturers are still spending millions of dollars in advertising; but they may decrease their ad tempo. One reason may be the investigations by the Food and Drug Administration and the American Medical Association; other reason is the advent of spring weather. First to drop out of radio is Anahist. Their two Mutual programs, *True or False* and *The Falcon* bowing out on 1 April and 26 March respectively.

1950 ad battle looms between transportation services

Airline business increased slightly while rail and bus transportation faltered a bit. Continuing the battle for passenger traffic, the railroads and airlines will maintain or increase ad budgets. New York Central System's ad outlay may be near \$800,000 with radio spots used extensively. Airlines, meanwhile, are becoming increasingly aware of value of spot radio.

Hollywood starting to recognize radio as ad medium

The movie moguls may be wising up to the fact that radio ads can bring people into theatres. Long identified with newspaper ad lineage. Hollywood is now turning to spot radio to bolster sagging attendance figures. Eagle Lion has plugged several pictures on the Yankee network: 20th Century Fox used radio for "12 O'Clock High" and RKO got on the radio bandwagon with a spot campaign for "Stromboli." Look for the practice to continue: popeorn alone can't combat the video menace.

Radio and TV set sales continue upward climb

The usual after-Christmas drop in demand which characterizes radio and TV set sales has not materialized. Radio sales are doing well and TV set sales have totalled more than 400,000 for four consecutive months including January.

Alaska fertile field for U. S. radio

American advertisers are invading Alaskan territory. Recent advertisers include Anhenser-Busch Inc. for Budweiser beer; Best Foods for Nucoa margarine; and Pillsbury Mills. Recent affiliation of KFAR, Fairbanks, and KENI, Anchorage, with NBC should point up to U. S. sponsors territory's value saleswise.

97% depend on WLS for live stock markets

Recent study shows penetrating power of WLS friendly service

complete market dominance to one radio station, the study just completed you. by the Chieago Producers Commission Association brought answers from 1,086 leading Midwest live stock producers-with 97% mentioning WLS among the stations they depend on for WLS first! live stock market reports.

77% Say WLS First

The question asked in the independent survey was: "What radio stations

Bill Morrissey, whose twice-daily broadcasts direct from the Union Stock Yards are "must" listening for live stock producers in four states.

demonstrating how do you depend upon for live stock sis of Midwest growth and prosperity. friendly, year-round service brings market reports? Please list these stations in order of their importance to

> Another 49.1% put WLS first among the stations listed, making a total of 28.8% plus 49.1% or 77.9% who rank

Pioneering Pays

It was in 1924 that WLS first pioneered in live stock market reports by radio and that same year brought several letters from farmers who had increased their profits by following the new radio reports.

Continuing through two and a half decades, WLS has maintained and vastly improved its service, not only to live stock producers, but to grain farmers, dairymen, fruit growers, poultrymen the whole business and agricultural backbone of the rich Chicago Midwest served by the WLS 50,000 watt, clear channel signal.

WLS for the Family

With daily service building the confidence and listening loyalty of Midwest farm and business men, the station's entertainment has been geared to hold the interest of all the family,

In 1949, 772,775 people saw WLS entertainers at state and county fairs. theaters and community events while 28.8% gave only one station-WLS. the same entertainers and air personalities were drawing more than a million letters. Every Saturday night sees the Eighth Street Theater sold out for two performances of the WLS National Barn Dance.

> This combining wholesome, family entertainment and the service Midwest agriculture and business need every day of the year, is unique with WLS -no other radio station duplicates this programming that goes right to the hearts of Midwest folks in city, town and farm.

> For example, in the recent live stock producers survey, with WLS being ranked first by 77% of all those responding, the nearest other station was first choice with only 12.4% less than one-sixth as many. WLS received almost as many mentions as all the other 78 radio stations combined—showing again the penetrating power of wellestablished, well-planned radio service.

To find out more about how WLS programming can reach this market for your product, see a John Blair man or write:

WLS, the Prairie Farmer Station, so that WLS broadcasting attracts the chicago 7, Illinois. 50,000 watts, solid family population that is the backers clear channel, ABC network.

because we're different—geographically and geologically. The Pacific Coast is a big area. It's broken up by mountains as high as 14,495 feet, and the marketing areas are far apart.

The great distances between markets, the mountains, the low ground conductivity—all make long-range broadcasting impractical. Yet Don Lee is the only network out here that does not rely on long-range broadcasting. Only Don Lee is especially designed for the Pacific Coast.

Only Don Lec offers a radio umbrella for each of 45 local markets—a local network ontlet of the proper size to completely cover that market for the least possible amount of money.

Equally important, with Don Lee—and only with Don Lee—you can get radio coverage to meet specialized distribution requirements. You buy all *or part* of Don Lee's 45 stations to get coverage of all *or part* of 45 local marketing areas—with no waste.

LEWIS ALLEN WEISS, Chairman of the Board · WILLET H. BROWN, President · WARD D. INGRIM, Vice-President in Charge of Sales

W. Alton Jones

Cities Service Company, New York

W. Alton Jones, president of Cities Service, has always enjoyed tackling a tough project. He got one in 1942. That year the government was sweating over the problem of piping Texas oil into industrial centers of the East. F.D.R. asked 11 executives of the country's top oil companies to pick a man for the job; their choice was Jones.

The executives chose wisely.

He completed the task in 350 days at enormous savings to the government. For his outstanding achievement he was awarded the nation's highest civilian honor: the Medal of Merit.

In 1920 Cities Service vice-president Frank Frueauff spotted Jones as a hot executive prospect. Frueauff asked him to become his assistant; Jones accepted. A short time later Frucauff died and Jones became vice-president.

The new veepce was eager to build Cities Service into a major organization. The bulk of the company's income was then derived from the distribution of gas, light and power. Jones considered this a small operation, wanted to expand. After studying the companyowned subsidiaries, he made his biggest decision: Cities Service was going into the petroleum business. He believed that this would fan the firm's business from a steady blaze into a roaring bonfire. He was right. By I January 1947. Cities Service had a record eash balance of \$169,000,000. In 1940 Jones was elected president of the company.

Broadcasting helped Cities Service up the ladder.

Cities Service has been using radio for 24 consecutive years. The firm sponsored its first program in 1927. Last year the company sponsored a simulcast of its current program Band of America. Of its estimated \$1,000,000 annual ad budget, in 1949 the firm spent more than \$600,000 for radio and \$41,125 for TV.

New developments on **SPONSOR** stories

See: "Out Of The Beaut Into The Home"

Issue: March 1948, p. 31 "Out Of The Beauty Parlor Into The Home"

Subject: Homemade Hair Waves

"Which twin has the Toni?"

The repetition of this simple question over the air has paid off for Toni; and soon the company launches a new radio campaign. As sponsor reported in its story "Out of the beauty parlor into the home," Toni spent \$5,000,000 for advertising as far back as 1947 . . . \$3,500,000 of it in broadcasting.

Recently Toni set 26 March as the kick-off date for a new advertising drive. The nationwide campaign will promote Toni's new product for short haircuts, the Midget Spin Curlers. A new kit with six midget curlers has been designed and will retail for \$1.33.

Still relying heavily on radio, Toni plans to use its three CBS network shows—Give and Take, This Is Nora Drake, Arthur Godfrey Show—to help it introduce and publicize the new product.

"Before You Junk Your Commercial"

Issue: 2 January 1950, p. 32 Subject: TV Critics Club

A new survey shows that TV commercials can increase repeat sales of a product.

Recently SPONSOR ran "Before You Junk Your Commercial," a story based on data taken from the first Look Hear study. Maxine Cooper (author of the television column Look Hear) conducted the study, came up with some impressive information on the buying habits TV commercials develop.

Results are now in for the Look Hear study number two. They indicate that a high percentage of those who have bought a product for the first time as a result of a TV commercial repeat their purchase. Of the original 2,000 names used in the first study, 300 were interviewed in the second study. The latter was conducted mid-January; and 66.6 percent of the questionnaires were returned.

A breakdown of the 62.5 percent of the respondents who regularly view the Sanka-sponsored Goldbergs is as follows:

1		,
Non-viewers who have purchased Sanka		16.3%
Total viewers who buy Sanka		25.6%
Total non-viewers who buy Sanka		6.6%
Among those who bought Sanka for the first	time as a	
result of TV commercials:		
Did repeat purchase		61.5%
75.4.7		DOFO

Did not repeat purchase ______38.5% While 77.7 percent of the regular Goldbergs viewers repeated their purchase of Sanka, only 25 percent non-viewers repeated the purchase. If you take from the sample the names of all Sanka repeaters, among them are 87.5 percent who are Goldbergs fans.

Among respondents who had bought Old Gold cigarettes for the first time as a result of TV commercials, all repeat purchasers were women. Non-repeat purchasers were equally divided between men and women.

Did repeat purchase (all	women)	27.3%
Did not repeat purchase	(men and women)	72.7%

It's clear that in the cases cited the influence of TV on viewers' buying habits didn't end with the first purchase.

EVEN KIDS IN ULRICH FAMILY HAVE OWN RADIO. TO SEE SIX OTHER SETS THIS TYPICAL FAMILY OWNS, TURN PAGE

How many radios in your home?

Trend to radio in every room
listening gives advertiser
multiple impressions

Junior: "Gee whiz. Mom. do we have to listen to that love mush? I bet Jack Armstrong wouldn't stand for anything that corny. Can I tune him in?"

Mom: "Junior, hush, Gloria Gush is coming on next, and I certainly don't intend to miss her. You'd think I didn't live here. Your father was glued to the baseball game all yesterday afternoon."

That was radio, prewar vintage.

The 1950 picture is different.

How different is a matter of great significance to advertisers.

Yesterday's picture was one of a single advertising message shared by a family. Today's picture is one of listening by individuals: of multiple advertising impressions within the several rooms of a single home.

Multiple-set listening is one of the major radio developments of the past decade. Its importance to sponsors and stations can hardly be overestimated when the possibilities are studied. Postwar momentum of the trend toward multiple sets in the home is creating a bigger, more potent broadcasting industry.

And hot on the trail of the multipleset-development, are researchers, manufacturers and industry leaders. The awakening to its implication didn't come overnight, but the story of radio's long disregarded out-of-home listening seems likely to save multiple set ownership from a similar fate.

LAUNDRY

DINING ROOM

It is only recently that time salesmen have been able to impress advertisers on the extent of out-of-home listening on the basis of fact, not theory. Even now, despite the overdue research on listening in autos and public places, salesmen refer to it as a "bonus" audience. Newspapers and magazines have never been known to consider bus, train, and subway readers as "bonus circulation." They've got their readers counted and classified, and they sell them as a sum total.

That listening has become a personal matter means much more to the advertiser than the fact that set ownership has increased 15.5 percent in the past year. The full meaning of more sets in the home can only be realized, and utilized when the effect it has on degree and intensity of listening is analyzed.

Family listening means distractions. Compromise on program choice results in a less intense, less interested audience. The collective folk listen with one ear; the advertisers's message gets similar attention.

Now dad listens to sports in his den; mom washes dishes in the kitchen to the tune of her favorite orchestra. Junior has his set—and Jack Armstrong—all to himself. All of which makes for attentive dialers.

In a report prepared especially for SPONSOR, Albert E. Sindlinger, head of Radox. gives findings of a multiple-set sampling in Philadelphia. Radox monitors every set within the home, and more than 100 homes in the sample have been equipped with this check system for over 18 months.

According to Mr. Sindlinger, there are few homes in the Philadelphia area without secondary sets; most extra sets are located in the kitchen or bedroom. (Favorite locations are indicated in more detail by the E. C. Hooper and lowa Radio Audience Survey figures in the box shown elsewhere in this article.)

"About 20 percent of our homes," says Mr. Sindlinger, "use the secondary set more than the living room radio. Most of the secondary listening takes place during the day. We have seen many examples of daytime listening where a kitchen radio was on for two or three hours, then a bedroom set will come on at a later hour, similarly tuned in. Bedroom listening later in the evening is primarily to music—except in children's rooms.

"We sometimes get multiple-set rat-

ings which are as high on secondary sets as on the primary sets for certain programs. In the evening, we find many homes listening to two different programs.

WORKSHO

This last point underscores the element of personalized listening. Program preference and loyalty is so decided that the family gives up the desire for companionship to satisfy it.

Sidelight findings on what happens to radio listening with the advent of a TV set in the home are included in the report. According to Radox monitoring, listening reduces to a near vanishing point for six months after the installation of a television set in the home. After six months, secondary sets come back into the picture, the majority dialed to musical programs, Within one year, listening habits start forming a definite pattern on kitchen and bedroom sets.

Hugh Beville. Director of Research for NBC, commented on the current multiple-listening pattern at a Pulse luncheon several months ago.

"As radio has moved out of the parlor into the bedroom, the den, the kitchen, and other rooms throughout the house, techniques which were primarily developed to measure family listening based on a single home receiver in the living room have proved inadequate to meet the changing situation.

"Here is just one example. A special study by Hooper revealed that a rating for a juvenile program more than doubled when additional questions were asked to find out from the telephone respondent whether or not listening was taking place in other sets within the home."

It is true that some techniques have not been refined for maximum usefulness. Some have shown a tendency to stop short of the individuals surveyed. It is not denied by various researchers that dealing in percentages instead of persons weakens the punch of current studies.

But to balance this existent negative factor, there is a heartening positive one.

The Iowa Radio Audience Survey is an excellent example. Conducted for the past 12 years by Dr. F. L. Whan of Wichita University for WHO, Des Moines. it is based on personal interviews with over 9,000 Iowa families, scientifically selected from cities, towns, villages and farms throughout the State.

The 1949 survey, released in March, showed that 47.5 percent of all Iowa families have two or more radios; 51.9 percent, auto radios; 9.7 percent of trucks are similarly equipped. (Particularly interesting, as a reflection of the extent to which multiple sets have be(Please turn to page 44)

Names, fine productions, make Theatre Guild tops

Steel melts the public

Over 50 percent of U. S. Steel's ad budget goes to winning friends, especially stockholders and employees

As Theatre Guild on the Air passes the midway point of its fifth season, there is no evidence that the show has sold as much as a thimble's weight of steel for its sponsor, the United States Steel Corp.

Yet U. S. Steel will shell out more than \$1.267.000 for the program during 1950. Add to that the \$5,000,000 that USS has spent on Theatre Guild since 1945. Consider the fact that not even the world's largest steel corporation can afford to throw good millions after bad. It follows that Theatre Guild on the Air is not supposed to sell steel. It's supposed to sell U. S. Steel not the product but the company. The story of how well it is succceding is one that advertisers in general, and institutional advertisers in particular, can profitably study.

Budget-wise, with more than a million and a quarter dollars earmarked each year for radio. U. S. Steel spends perhaps another million for advertising in magazines and other printed media, mainly on an institutional line. But it's radio that does the big job.

U. S. Steel went into radio primarily to "linmanize" itself to the public to change the popular concept of this giant corporation to something less intimidating than that of a shapeless but vagnely sinister mass. As the Investment Dealers Digest pointed out

many years ago was the butt of politic est, reserved, homespun public relacal cartoonists, rabble-rousers. Congressmen. It was the embodiment of all that is considered reprehensible in business. Today Big Steel is regarded benevolently by a large portion of the public. This change is due almost entirely to highly intelligent public information activities. Recently we had oceasion to comment on the commer-

tions at its finest. . . .

J. Carlisle MacDonald, assistant to Irving S. Olds, USS board chairman, modestly concurs in these judgments. MacDonald is in overall charge of U. S. Steel's public relations program, of which Theatre Guild on the Air (representing more than half of the advertising budget) is the core. Another cials of U. S. Steel's radio program, unsolicited testimonial that Olds and Theatre Guild on the Air brief, hon- MacDonald found especially heart-

in a recent issue: "U. S. Steel not so Theatre Guild's Lawrence Languer, USS Irving Olds, public relations chief J. C. MacDonald

warming is this excerpt from a recent column in the Pittsburgh Post-Gazette by that newspaper's sports editor, H. J. Boyle: ". . . It is a pleasure to find the (radio) industry coming up with the sort of program the USS sponsors good plays, serious and comic. by capable performers. Even the commercials involved are not only in good taste, but they are interesting and informative, and because they are both of these, they are convincing.

"... Certainly the USS which has its roots in Pittsburgh... is building up a good will by a subtle, indirect approach as shown by these friendly words from this Pittsburgh observer who was born and raised with steel workers... and who finds reasonableness, plausibility and sympathy arising from the program content and the way the whole thing is handled."

The Pittsburgh Post-Gazette sports editor concluded: "I am not at all cer-

tain that the program in question will cause Aunt Edna to specify that her next washtub must bear the imprimatur of the U. S. Steel Corporation. But catching Aunt Edna probably is a minor aim compared to the larger one of convincing the public at large, and particularly that part of the public which works for the corporation, that directorships and management have a respect for the good opinion of all and (Please turn to page 49)

13 MARCH 1950 25

Keep you

The best ad libs in radio are usually in the script.

That's the story behind many of radio's top commercial successes. Shows like Fibber McGee and Molly, The WLS National Barn Dance, WWVA Barn Dance, Grand Old Opry, We the People, You Bet Your Life seem natural . . . sparkling; but the spontaneity is carefully planned.

Planned spontaneity yields big dividends-in pleasure to the listener and dollars to the sponsor. It's been one of the most important ingredients of programing since crystal-set days. And its importance has grown through the years. In fact, radio's great commercial success as an advertising medium is based on the warm and natural friendliness of its unseen voices.

Back in the early days, radio's spontaneity was an accident. As George C. Biggar. National Barn Dance director at WLS puts it: "In the 1920's we turned a bunch of dancers and fiddlers loose in the studio and let them have

We The People MC helps his guests deliver lines

Groucho Marx, ad lib king, sets up gags in advance

program natural

Planned spontaneity is a fine art with many a sponsor and station

at it."

But that didn't work. Shows were often poorly balanced. Without a script to follow, the master of ceremonies often faltered. There were awkward pauses between numbers. Shows seemed amateurish rather than natural.

Then the reaction set in.

WLS and a host of other stations made complete scripts mandatory. Every call, every chuckle, every bit of byplay was written down. As a result the informality of shows like the National Barn Dance was lost.

But the next step took care of that. National Barn Dance and other topflight programs developed the planned spontaneity formula. It combined the best aspects of "a bunch of dancers and fiddlers loose in the studio" and a completely written show.

Today, The National Barn Dance has the various elements of the show carefully scheduled in the script to give the overall effect of spontaneity. But

there's provision left for apparently casual interludes.

When Bill Bailey introduces a tune. Captain Stubby may step forward suddenly and shout, "Let's all join in and sing this one, folks." The brief community sing, 'wakes up' the audience, gives them a feeling of participation. This feeling is communicated to the listeners at home.

Sponsors of the National Barn Dance have proved that when an audience feels itself part of the show, product and sponsor identification zoom.

The sponsor of Grand Ole Opry, Prince Albert Tobacco, knows how closely product and program should be wedded. Prince Albert has sponsored this folksy offering since 14 October, 1939. Along with a host of regional advertisers, Prince Albert has found that planned spontaneity keeps both the audience and the sponsor happy.

The Opry script is used for guidance and timing only. The show is neighborly, unpretentious—never slick or glib. Folk songs, gags, and humorous situations lend down-to-earth ap-

One of the foremost members of the lets-be-ourselves fraternity is Jack Benny. The seemingly off-hand humor of his program is painstakingly rehearsed: the integrated Lucky Strike commercials are carefully plotted.

Other advertisers were quick to realize that what Benny did for his sponsor could also be done for them. Thus, many members of Benny's cast-all masters at the art of being naturalnow have programs of their own.

The Ronald Colmans are sponsored by the Schlitz Brewing Company on Halls of Ivy. Colgate Dental Cream and Palmolive Peet bankroll Dennis Day in A Day in the Life of Dennis Day. Phil Harris and Alice Faye sport the Rexall banner.

These advertisers knew that the sup-(Please turn to page 56)

ANOTHER LOAD OF ISBRANDTSEN LINE COFFEE FOR RADIO TO SELL. LINE IMPORTS, SHIPS, ROASTS "26" BRAND COFFEE

The seafaring coffee merchant

Radio sold more "26" Coffee for Isbrandtsen

line in 30 days than newspapers had in a year

brands on the Eastern market. Many two objectives that made old coffee of the competing brands were cheaper: campaigners look like neophytes: they all were well-established.

The average grocer's slielves sagged under the weight of a dozen or more brands of coffee, each in several different grinds. It was, on the whole, the kind of competitive situation that turns brave merchandising men pale.

Being new to the coffee business. Isbrandtsen & Sons, Inc., makers of

When "26" Coffee was intro- "26", weren't aware of the hazards of duced in 1943, there were the trade. The company merely turned already more than 65 other to radio and almost overnight achieved got '26" Coffee down from the shelf and into a position of prominence in the retail store; they induced grocers themselves to declare publicly that "26" was the best coffee they'd ever tasted, the brand they used in their own homes. In one test market radio sold more coffee in 30 days than newspapers had in a year.

Isbrandtsen managed this twin killing by means of a unique "Grocer Participation Plan," which will be described in detail.

Radio did such a phenomenal job for Isbrandtsen's "26" Coffee that today virtually all of the firm's \$100,000 advertising budget is invested in that medium, with a small residue devoted to "reminder" advertising in newspapers. The current "26" spot schedule. which became effective 1 March, covers 14 AM stations and one television station in New York, Connecticut, and

SPONSOR 28

Massachusetts. The schedule, with the number of weekly announcements, follows:

Bridgeport, Conn. WNAB 10 one-minute announcements Hempstead, N. Y., WHLI five one-minute amountements New Haven, Conn., WELI 15 one-minute announcements Springfield, Mass., WSPR 10 one-minute announcements Waterbury, Conn., WATR 10 one-minute announcements Worcester, Mass., WNEB 15 one-minute announcements Stamford, Conn., WSTC 10 one-minute announcements New London, Conn., WNLC 15 one-minute announcements Buffalo, N. five 50-word announcements

The company prefers announcements to participations, finding them "cheaper in the long run." and generally more flexible and easily adapted to fluctuating market conditions. Isbrandtsen regards one year as the minimum campaign period for any single market; the company has never made a practice of cutting a campaign short after the initial 13-week cycle.

The spots themselves sell hard around the angles of brand identification and superior quality. Typical copy themes are "The best coffee you can buy is your best buy," and "The coffee with a number for a name."

The numerical name, incidentally, is derived from the address of the parent

ARE SOME DISK JOCKEYS PRISONERS OF THE RECORD COMPANIES? ANSWER IS YES

local personalities and salesmen. Advertisers and stations both profit from that. But both can lose heavily in the long run if the success of the disk jockey leads the station management to abdicate control and supervision of the content of the record sessions. There's plenty of evidence that this often happens.

It's natural for station managers and program people to assume that periods filled mainly with the d.j.'s talk and recordings of his choosing call for little attention. The very ease and simplicity with which the d.j. programs his time seems to defy any need for supervision.

But during the last two years enough d.j sessions have gotten far enough out of hand for several reasons to worry a lot of station managers. They know that whatever hurts their program structure hurts their advertisers too. And many d.j.'s just men't programor the advertiser.

This article will cite abuses of programing privileges among d.j.'s. It will also suggest how disk jockey programs can be improved for the benefit of sponsors and everyone else

over-all. Disk jockeys are often great ing in the best interests of the listener lar d.j.'s in many markets are paid to push their labels by record companies. or perhaps in even more cases by local distributors. The extremity to which this "pushing" is carried varies with the d.j. He may get as little as \$10 a week. Some popular and prosperous d.j.'s are known to bank a sum con-It's no secret in the trade that popn-siderably in excess of their salaries.

D.j.'s are popular salesmen, but need programing supervision by station brass

AS SHOWN BY THIS GAG PICTURE AND TEXT. MOST D.J.'S PLAY FAIR WITH PUBLIC

with an obligation to push the wax of ing pleasure, the chances are you'd be a certain firm at the expense of rival labels is in a position to think first of program effectiveness. Yet if, on the be the most independent. basis of what has been said here, you were to think of the most popular d.j.'s influence than direct subsidies that inin the top markets and guess who is terferes with strict programing for lisplaying the game of the record people tening. After all, there isn't enough

It is clear that no record spinner ahead of strict programing for listenwrong. Some of the biggest name record spinners in the country happen to

There is a much more widespread

Most d.j.'s like "hep" personality below pick records honestly from huge stock

money in the record industry to subsidize all the most important d.j.'s in all the most important markets. But gifts, dinners, and other forms of flattery are another matter.

This flanking movement on the d.j. by field representatives of record firms, song publishers, etc., may actually influence many a record jockey to an extent of which he is quite unaware. It's so easy to play a "good guy's" disk without bothering to compare it with other music.

Some d.j.'s take the matter of flattery and attention very seriously. if they consider they have been slighted in some way, they will refuse to play the music from the source of their affront (real or fancied). Such statements have, in fact, been made publicly and aren't as rare as you might think.

Only determination by the station management to reassert its basic responsibility for programing can prevent such abuses.

So simple a thing as a regular check of the program log can keep a station or program manager informed about the music being played, warn him if things are getting out of line.

A program set-up in which d.j.'s are allowed to operate without supervision of program content inevitably leads to growth of the "big-shot" complex in a certain number of cases. This is just as true on small stations as on larger ones. Many a band leader could duplicate in essence the story told recently by a well-known musician.

He had been making a series of onenight stands, hadn't slept in two days, and was dragging with weariness. But he wasn't too numb to miss taking the popular local d.j. to dinner. The record spinner was a youngster who had come up fast and was eager to make the most of his local fame. He asked the band leader to appear in person on the next day's show. "At what time?" he asked, hoping the kid had an afternoon show. When the kid said "6:00 a.m." the band leader tried to beg off. The d.j. looked him straight in the eyes and said. "If you don't I'll never play another record of yours." And he meant it.

This is not to say that the majority of d.j.'s aren't as modest as the next professional, or that they don't operate as intelligently as they can, and

31

MIX—To combine by recording or re-recording various sounds to blend them together.

MOBILE UNIT—Field television equipment as mounted in trucks, and/or trailers, and generally used for sports, special events and other shows not in studio.

MONITOR—A centrol kinescope used by personnel (producer, switcher, technical director) to check and view camera pickups or on-the-air pictures.

MONITOR (verb)—To check show and actions as they appear on a kinescope.

MONTAGE—Series of pictures or images to create a unified effect or impression.

MOVIOLA—Special machine for viewing film in small size.

MURAL—A photographic enlargement of a scene used to give the impression that the scene actually exists in the studio.

MS—Medium shot. A relative term halfway between a CU and a LS.

35 mm.—Standard motion picture size film. Runs 90 ft. to the minute, 30 ft. to chain break.

16 mm.—Small size film currently being used for most film commercials in the smaller TV stations. This is about one-third as expensive to use as 35 mm., and as reproduced on TV, videowise, is comparable to 35 mm.; however 16 mm. suffers greatly audio-wise on TV.

N

NARRATOR-An off-camera or background voice.

NARROW ANGLE LENS—Picks up small portion of set or action.

NOODLE—To play a few bars of background music usually behind titles: known as noodling.

0

OFF-SCREEN NARRATION --- Any narration that is not lip sync.

ON THE AIR-Program in process.

ON THE NOSE—Slang denoting perfection in timing, focus, etc.

OPEN END—A TV film, program or commercial that leaves space or time at the end for personal or specific local identification.

OPTICAL LENS—Lens focusing the image of the scene to be televised on the light-sensitive plate of camera tube.

OPTICAL PRINTER—A gadget used to get a positive film that varies in speed and size from the action originally recorded on the negative. Also used in making wipes and other effects.

OPTICAL VIEW FINDER—Device on a TV camera used by the cameraman to accurately frame and focus the scene to be televised.

ORTHICON—Extra light-sensitive RCA camera tube currently being used in field cameras for most outdoor pickups.

OUT SYNC—When the TV image on a receiver screen is seen to roll vertically or horizontally. It is usually the result of the receiver circuits being out of synchronization with the transmitted signal.

P

PAN—To follow action to right and left or up and down. A gradual swinging of the camera in any direction. To swing camera across a scene.

PANORAMA SHOT-"Pan left or pan right."

PARABOLA—A special direction microphone mounting, usually circular in shape used to pick up crowd noise, band music, etc.

PICTURE—The image telecast.

P.L .- Private line.

PLATTER—A recording usually used as the audio portion of a film commercial.

POINTILLAGE—Refers to a painting technique whereby a plane surface is built up.

POSITIVE -- A projection print from negative film. The true picture.

POT—TV slang for a fader or the instrument used to lower or raise the sound level.

PRACTICABLE—Real. Actually to be used in opposition to something fake, or that is installed for purely aesthetic purposes.

PRE-SCORING—The recording of sound prior to the shooting of the picture.

PRINT—A positive copy of a film from the original film negative.

PROCESS SHOT—Film combining real photography with projected backgrounds, or model set or drawing.

- PRODUCTION—Another generic term, usually refers to the TV show and all details involved.
- PROJECTION TYPE RECEIVER—A TV receiver using optical projection from a kinescope tube on to a large screen.
- PROPERTIES—All physical materials used in a scene, i.e. furnishings, decorations, or articles utilized by actors in portraying their respective roles.

R

- **RECORDING**—Means of recording visual and/or audio action and sound on film or phonograph discs.
- REEL—Spools on which film is wound. One 35 mm. reel is 1,000 feet. One 16 mm. reel is 400 feet.
- **RELAY STATION**—A radio frequency transmitter usually located some distance from the main transmitter from which TV signal is transmitted to a more distant point.
- RELEASE PRINT—Final print of commercial, film, or kinescope to be delivered to TV station, client, or agency.
- RELEASE STUDIO—Expression used by director or producer to talent and studio personnel indicating end of rehearsal or broadcast.
- RESOLUTION or DEFINITION—Degree of reproduction of the detail of an image, scene, sets and/or background after transmission through complete TV system to receiver or monitor.
- REVERSAL—Film process that results in a positive print without the use of a negative. Usually restricted to home movie 16 mm. production; however, upon occasion reversal prints are used in 35 mm.
- REWIND—To rewind a projected film in order that it is ready for reshowing.
- RIG-Machine used to hold, move or control object televised.
- RING MIKE—Microphone installed over boxing, wrestling or such events to pick up audio or sound portion of TV picture.
- ROLL IT—Cue to projectionist for him to start film projector.
- ROLL UP—Trick effect used to change from one scene to another wherein first picture begins to roll from the bottom, revealing second picture.
- RUNNING SHOT—Picture in which the camera is dollied along with the action.
- **RUSHES**—First prints from a film usually developed overnight so the producer or client can examine film production of previous day.

S

SCANNING—The electronic analysis of the optical TV image into

Off-screen narration
 On the nose
 Optical view finder
 Slide
 Take it away
 Talk back

- a series of parallel horizontal lines traced from left to right in sequence from top to bottom.
- **SCENE**—A single sequence in a TV production which may consist of one or more shots.
- SCENARIO—A complete written guide of a TV show describing story and action. Usually applies to a TV film rather than live show.
- SCOOPS—Large kleig lights used in TV studios.
- SCORE—The music for a TV commercial or show.
- SCRATCH PRINT—A rush or quick print that is used for editing.
- SCRIPT—A complete written guide for a TV commercial, film, or live show. Synonym for continuity. Term is generally used in preference to scenario.
- SET—A TV scene used or constructed in the studio where action takes place and is shot. A film camera.
- **SCRIPT GIRL**—TV director's assistant handling script preparation. clearance, editing, etc.; and frequently timekeeper and prompter in dry runs and camera rehearsals.
- SET-UP—The installation of set, props, backgrounds, etc., in studio, plus the necessary televising equipment, i.e., cameras, lights, mikes, etc.
- SHADING TECHNICIAN or ENGINEER—The individual who regulates the brightness and detail of a TV image or picture before it is transmitted.
- **SHADOWING**—To simulate by trick effect a natural shadow what cannot effectively be created through the use of TV lighting alone.
- SHOOTING OFF OVER—To take in areas in a given camera shot that are not wanted or that are beyond the horizontal or vertical limits of the established set.
- SHOT-A single continuous run of the TV camera.
- SIGNAL—Any transmission of the TV picture and sound.
- SIMULCAST—A combination AM radio and TV show; in other words, to broadcast a TV show at the same time that it is being televised.
- SINGLE SYSTEM—Sound and picture recorded on the same film at the same time. Also frequently known as lip sync.
- SLIDE—A title or picture on a single frame of 35 mm. film that is projected into the camera.
- SLOW MOTION—The slow movement of objects which are produced by photographing on film more frames per second than are projected per second.
- SNAP—A descriptive term defining right proportion of contrast and sharpness in a TV picture.
- S.O.F .- Sound on film.
- SOUND TRACK—That portion of 16 or 35 mm. film that is devoted to the recording of sound.
- SPECIAL EFFECTS—Miniatures, diaramas, and various electrical and mechanical devices used to simulate impressive backgrounds, massive titles, etc. Any trick device used to achieve scenic or dramatic effects impossible of actual or full-scale production in the TV studio.
- SPECIAL EVENTS—TV programs of great news interest, usually not regularly scheduled, e.g., sporting events, meetings, parades.
- SPLICE—To join together two pieces of film with film cement.
- SPLIT FRAME—A composite print of two separate actions on the same frame; in other words, two different pictures combined into one picture.
- SPOTS—Spotlighting used on TV sets or stage.

- **STAGING PLAN**—A scaled print or plan of the studio, set or stage upon which are recorded the location of walls, furniture, property, talent, etc.
- STAND BY—Announcer, film, etc., held in reserve for emergency
- STAND BY (verb)—Cue to talent, cast or crew that TV program is about to go on the air.
- STILL—A still photograph or other illustrative material that may be used in a TV broadcast.
- STOCK SHOT—A scene not taken especially for the production but from film files or film library, i.e., Eiffel Tower, Statue of Liberty, frequently inserted for atmosphere.
- STOP—The degree of opening of the lens of a TV camera.
- **STOP MOTION**—Film taken by exposing one frame instead of many frames at a time. Object or objects are usually moved by hand a fraction of an inch for each exposure according to a predetermined pattern.
- **STORY BOARD**—A set of drawings used to show sequence of a production. Idea being to have one drawing for every change of action or scene, usually including both pictures and script.
- STRETCH—Instruction given to cast or crew to stall for time.
- STRIKE—To take down set or scene and to remove it from the stage.
- SUPER-IMPOSE or SUPERIMPOSITION—The overlapping of an image produced by one camera with the image from another camera. Both pictures being visible, but appearing finally as one picture.
- SWITCH—A change from one camera, lens or camera angle to another.
- SYNCHRONIZATION—To maintain synchronic perfection between the scanning motions of the electron beams and the camera tube and in the cathode ray tube in the receiver or monitor.
- **SYNOPSIS**—TV commercial, program or story written in action sequences but without full technical data, directions of the continuity, or script.
- **SYNTHETIC DISTORTION**—To impart by various techniques a seeming irregularity to lines and services that are actually smooth and rectangular.

T

- TAKE—A single shot picture and/or sound. Sometimes specifically a satisfactory or usable shot. Other variations or takes are made with same camera set up and actors going through identical business.
- TAKE (verb)—Switching directly from one picture or camera to another picture or camera, as "take one, take two."
- TAKE IT AWAY—Directions to talent, announcer, etc. "You're on the air."
- TALK BACK—Phone circuit or cans from director to announcer or other crew.
- **TECHNICAL DIRECTOR**—The director of all technical facilities and operations, lighting, cameras, sound, switching, in a studio production.
- TELECAST—A television broadcast.
- **TELEPHOTO** LENS—A very narrow angle lens which produces large size images at extreme distances, frequently used at sporting events, etc.
- TELEVIEWER—A member of the television audience.
- **TELEVISE**—To transmit a picture electronically by using television equipment.

- TELEVISION—The transmission and reproduction of a view, scene, image or person by an apparatus that converts light rays into electrical impulses in such a manner that those same objects may then be transmitted and re-converted by a receiver into visible light rays forming a picture.
- **TEST PATTERN**—A specially made design of numerous lines and/ or circles transmitted for the purpose of correctly setting the focus and tuning of an image on a television screen.
- **TEXTURE**—An impression of depth and irregularity that is given to a plane surface by using paints or other decorative materials.
- THREE SHOT -TV shot of three performers, etc.
- TILT—Slow camera movement, up or down.
- TITLE MUSIC—Background music behind opening and/or closing titles and introductions.
- TITLES—Any title used on a TV program. Can be motion picture film, card, slides, etc.
- TRACK—The film or section of a film used for the sound recording.
- TRANSPARENCY—A technique whereby illustrative or written material is placed on a transparent surface through which background material may be seen as the transparency is photographed by the TV camera.
- TREATMENT—An intermediate step between synopsis and script where the complete TV story, commercial or production is completed.
- TRIPOD—A three-legged TV camera mount.
- TRUCKING—A movie term meaning a traveling shot in which the camera moves position during the exposure. Similar to dollying in TV terms.

V

- VIEWER—A machine used to examine TV film for editing or cutting.
- VIEWING LENS—The lens on a TV camera used by the camerman to view field of action.
- VIDEO—From Latin meaning to see. Pertain to the television broadcast of images. Usually used as a noun to denote sight broadcasting as opposed to sound broadcasting.
- VIDEO SIGNAL or PICTURE SIGNAL—That portion of the product of the television camera that is the electrical counterpart of the scene televised.
- **VOICE OVER**—Narration type recording as opposed to lip sync or live sound.
- VOX POP—A spontaneous radio or TV interview.

W

- WALL TREATMENT—A technique used to simulate numerous surfaces on the walls of a set such as wallpaper, bricks, stucco.
- WIDE ANGLE LENS—A lens of very wide angle of projection which is used to pick up a large portion of the set, talent, audience, etc., at a short distance.
- WILD—A film or picture which is taken to fit pre-recorded narration or sound.
- WIPE—A transition from one scene or image to another in which a new scene gradually replaces the old one in some gradually increasing geometric pattern, i.e., circle (circle in, circle out), square (expanding square), fan, roll, etc.
- WIPE OVER—Optical film or printing effect by which one scene or image moves into another geometrically.
- WOOF-TV slang signifying "on the nose" or "okay."
- WOMP-A quick flare-up of light or brightness in a TV picture.
- WORKPRINT—A print (frequently a rush) used in editing and cutting to determine the final composition of the finished film.

Mr. Sponsor asks...

Are give-away programs declining in popularity?

President Edwin J. Anderson Goebel Brewing Company, Detroit

The picked panel answers Mr. Anderson

The Hooper figures show that quiz and audience participa. tion shows have declined in popularity during the past two years as have some other show types. However. this question re-

Mr. MacCracken

quires a "Yes, but- " reply.

It has been popular to classify almost any program on which people compete for prizes as a give-away. If our question covers all audience participation and quiz shows, as I understand it does, the term "give-away" is, in my opinion, a misnomer.

There are some programs on which very little effort is required to win a prize. However, if you ever watched contestants on Break the Bank, for which our agency is responsible, you know they aren't "getting something for nothing," as the term give-away implies. Early questions for lower amounts, are relatively easy. But if you're going to get into the money, you have to know your subject, and work for your reward.

The bad publicity given to "giveaway" shows by the FCC, and picked up by many columnists, had harmful effects. Many people have the feeling that to admit they enjoy a good quiz show reflects on their taste or mental stature. But these programs as a class

sured on a cost per 1.000 listeners basis, they are likely to show relatively low costs, for they are inherently comparatively inexpensive to produce.

Radio program types show a tendency to follow a rough cycle pattern. One quiz becomes a fad. Immediately, a number of others of the same general pattern appear. Millions of radio listeners enjoy these shows. But they don't want an exclusive diet of such fare. As the number of shows of the type increased, people had more opportunities to enjoy this kind of entertainment. Consequently, the listening to certain individual shows did decline.

I doubt that many new such programs will appear during the next year or two. However, I believe that we will always have a certain number on both radio and television, not merely because they can be produced at low eost, but for a much more important reason: They represent a basic type of entertainment.

Answering questions, in one form or another, is a type of game that has been popular for centuries. And "playing a game" is what these programs offer. Hearing people win hundreds or thousands of dollars in each or merchandise isn't the whole attraction for listeners. It's the fun of listening to see if you can answer the questions. the challenge of pitting yourself against the contestant on the show.

Plus, of course, the enjoyment you get from the master of ceremonies and other elements on any given show.

such a feeling of friendliness and good fellowship; that send out the contagious feeling of people having a good matter. Most give-aways are not en-

still do enjoy mass popularity. Mea- time. There always will be many. many lonely people who will enjoy the opportunity of being able, merely by turning on their radio or television set, to bring a gay, happy, friendly party into their homes; a party in which they can participate.

To summarize: "Yes, somewhat." But don't sell these shows short. They will fill a popular need; they will always have a place in the entertainment pattern.

> CHESTER MACCRACKEN Vice-president—radio & TV Doherty. Clifford & Shenfield New York

Mr. Manilla

Everything happens in cycles. I'd say that the radio give-away cycle which started with Horace Heidt and the Pot of Gold, achieved its golden age with Stop the Music. And I believe the cy-

cle of the give-away program on television is now on the decline.

The novelty of the Pot of Gold was not only great enough to establish the give-away trend, but it was even strong enough to sustain a large number of imitators—for a long time.

When Stop the Music came along, the novelty of the give-away was not enough to make it a high rating show. Not even the addition of the interrupted melody or the obscure-tune gim-One final point. There are few, if mick would have been enough. But any, types of programs on that exude Stop the Music is in itself a fast-paced, exciting show. It's good entertainment. and that. I believe, is the heart of the tertainment; they're just give-away shows.

The end of the give-away cycle is the give-away devoid of novelty and devoid of entertainment. Oh, the unadulterated give-away will continue on a local option basis. But for the networks—the old order give-away giveth way to the new. The new what I don't know; but the give-away's successor will have novelty value and/or novelty plus entertainment.

Parenthetically, I don't argue as to whether the give-away was a good device or bad one for a sponsor. To be crassly pragmatic, it's a rare sponsor who objects to the program content of his own high rating show.

James N. Manilla
TV Director
Cunningham & Walsh
New York

Mr. Monroe

No, give-aways are not declining in popularity. Programs fluctuate, like every type of entertainment, but there is no discernible lessening in the inherent attraction. And as long as

there is the human equation, there won't be.

People want something for nothing. Blunt, but true. It can't be white-washed or disguised. There is the possibility of getting something for nothing on give-aways with the investment of nothing but time. And time isn't important to the average listener. Even if the radio listener doesn't win—and the chances are remote that he ever will—he gets a vicarious and dramatic thrill when someone else does. A kick that very few entertainments can equal.

The only drawback to present day give-aways is that most are cut from the same stencil. As soon as one show becomes popular, it is aped, except for a few minor details in presentation. But despite the sameness, they are thriving and will continue to do so. The augury is bright now, and will be more roseate when give-aways are given the fillip of originality or novelty.

Bob Monroe
Owner of Robert Monroe
Productions

A REAL BUY

YOU CAN REALLY BUY!

This is no mouth-watering story about some other advertiser's impressive rating on a show you can't buy. It's factual information about 15-minute programs you can actually buy on Chicago's increasingly productive Voice of Labor—WCFL. It's an opportunity to buy tuned-in radio homes to the tune of only 82 cents per thousand!

It's WELCOME TO HOLLYWOOD

(formerly Breakfast in Hollywood)

with Jack McElroy

Monday through Friday, 1:00 to 1:30 p.m.

with a ready-made Chicago Pulse of 2.2

And remember that WCFL, despite its amazingly economical rates, delivers 50,000 Watts, at 1000 KC, in the Center of the Dial.

WCFL's Pulse is Beating Faster—in fact there's been a 30% rating increase since WCFL inaugurated 50,000-watt operation. And there's growing strength in response from throughout WCFL's primary area, which has 2,724,406 radio homes. Ask your Bolling Company representative for the WCFL story.

Or, if it's spots your interested in, WCFL offers one-minute availabilities reaching tuned-in radios at a cost of only 48 cents per thousand.

Radio results

SPONSOR inaugurates a new

department. It will tell the

result story of local radio

With this issue sponsor inaugurates its Radio Results department designed to tell the result story of local radio. A glance at the reports on this page will show what you can expect to find in this space every other issue: cut-to-the-bone capsules that tell how radio has sold for sponsors all over the country.

sponsor hopes the new department will foster renewed awareness of radio's great selling strength on a local level.

Suitable material should be addressed to Radio Results, SPONSOR, 510 Madison Avenue. New York 22.

COUNTY FAIR

SPONSOR: Multnomah Fair

AGENCY: Direct

CAPSULE CASE HISTORY: 2,000 general admission tickets to the fair were made available to listeners at 50c saving per ticket. Only provisions were to write for them and use them before 2 p.m. All 2,000 tickets were sold on the first announcement, and 1,440 more tickets were made available. These were also sold. Of the 3,440 tickets given out, 3,176 were checked in at the gates. Once again radio had pulled the customers in.

KPOJ, Portland, Oregon

PROGRAM: Spot

AUTOMOBILES

SPONSOR: Parsons Inc.

AGENCY: Direct

CAPSULE CASE HISTORY: This company found itself with a high inventory of used cars on its hands. Broadcast advertising was given the opportunity to move these cars and move them it did. An intensive spot and participation campaign was used for a three-week period. One hundred high priced units were sold with a new volume record established. Client is now completely sold on radio since radio sold for him.

WCSS, Amsterdam, N. Y. PROGRAM: Spots and Participations

CORN CRIBS

SPONSOR: Carlson Cribs

AGENCY: Meneough, Martin & Seymour

CAPSULE CASE HISTORY: The sponsor started a campaign just before and during the corn harvest. Listeners were urged to request a visit from their nearest Carlson Crib dealer. The weekly Sunday Visit program. supplemented for a short period by daily spots at 6:05 a.m. brought 148 responses. While increasing their sales, sponsor also encouraged interest in more and better storage. The moral: sow via radio and ye shall reap.

WMT, Cedar Rapids

PROGRAM: Sunday Visit

FOOD

SPONSOR: Brumfield's Market

AGENCY: Direct

CAPSULE CASE HISTORY: The owner-manager of this large meat market sold sausage at 25c a pound and told people about it via a Friday night high school football game. By noon Saturday, three tons of sausage had been sold. When the store closed that evening there was left only a beef and a half and three hams. That isn't all. The demand for sausage continued during the next few days, so six more tons were prepared—and sold! A very meaty radio result for Mr. Brumfield.

WPLH, Huntington, West Va.

PROGRAM: Football Game

DEPARTMENT STORE

SPONSOR: Greenberg's

AGENCY: Direct

CAPSULE CASE INSTORY: The store manager did not think radio would pull but decided on a trial of the medium. Some 300 sweaters, ranging from \$2.98 to \$3.98, were set aside to be sold for \$1.00. Only one 50-word chain break was used at 7:45 a.m. An hour-and-a-half after the store opening (10:30 a.m.) the original 300 sweaters offered for sale plus an additional hundred were sold. Sold, too. on radio was the previously skeptical store manager.

WSTC, Stamford, Conn.

PROGRAM: Spot

BANK

SPONSOR: Local Federal Savings

AGENCY: Direct

capsule case instory: This bank has been an air advertiser for 13 years. Since 1945, it has sponsored a 5 p.m. newscast. The bank president's quote speaks for itself: "We have made hundreds of home loans and received thousands of dollars in savings as a direct result of these newscasts. Their effectiveness seems to increase each year." Radio's ability to "sell" there's something dubious potential advertisers can bank on.

WKY, Oklahoma City

PROGRAM: Newscast

M. L. P. D. are the four letters we've borrowed from the alphabet to tell KXOK's outstanding story of results. They stand for More Listeners Per Dollar! RTS...S PONSOR REPORTS...

(Continued from page 2)

Revised edition of broadcasting history

"The First Quarter Century of American Broadcasting," published in 1946, is now being revised, according to Arthur B. Church, KMBC president. E. P. J. Shurick, who compiled the original volume, has also edited revised edition. Mr. Shurick joined CBS on 1 March as market research counsel.

BMB study big help to spot buyers

Timebuyers at agencies who have seen portions of 1949 BMB study generally feel new audience composition figures will be highly useful in solving coverage problems. This particularly true in planning spot campaigns. But it also applies to such network problems as where (and whether) to add to station lineup. About 20 new subscribers came into fold during February. BMB expects that figure to be multiplied many times during March and ensuing months as agencies have chance to study full report.

Multiple-set ownership is upping listening

The Iowa Radio Audience Survey shows that multipleset families listen more than one-set families. Findings show number of extra listening hours is in almost direct proportion to number of sets in home. In homes having four or more sets, average of multiple-sets tuned in simultaneously totals more than one hour. This hour should be taken into consideration by advertisers.

Candid camera commercials click

Check on believability of Philip Morris TV sales talks by Schwerin Research Corp. reveals that Alan Funt's candid camera commercials are two and a half times more effective than any other PM commercial in conveying credibility of ad claims.

Non-set owners swell TV coverage

TV audiences may represent as high as 25 percent more coverage than Sponsors count on when buying video. Trend to increased viewing by non-owners of TV sets is indicated by studies of New York market by Advertest Research and Gilbert Television Research, and by American Research Bureau in Washington, D. C. According to an ARB diary survey just completed in 1,000 Washington homes, nearly 13 percent of non-TV set owning families view television regularly each week for an average of 3.4 hours per person per week.

Daytime listeners prefer WGAR. Hooperatings (Dec. '49-Jan. '50) show that from 8 A.M. to 7 P.M. weekdays, WGAR has the first five top rated shows... and 12 of the top 15! WGAR programs are first in 28 out of the 44 quarter-hour periods!

in Northern Ohio..

the SPOT for SPOT RADIO

Right: Mr. William E. Hunger, President and Treasurer of the Union Oil Company of Ohio, member of Cleveland Petroleum Club, Ohio Petroleum Marketers Association, Cleveland Rotary Club and Cleveland Chamber of Commerce. Left: Mr. L. L. Altman, Vice President and Secretary of the Union Oil Company, member of Cleveland Petroleum Club, Ohio Petroleum Marketers Association and National Paint, Lacquer and Varnish Association. Union Oil is a WGAR advertiser.

Don Hyde with 'This Is Cleveland" is one example of a WGAR program available for sponsorship. "This Is Cleveland" features Clevelanders in the news and life in the city from an unusual angle. It includes such on-the-spot tape-recorded events as a jury-fix and the confessions of a dope addict.

HOW MANY RADIOS?

(Continued from page 23)

come part of the homefront, is the fact that 12.5 percent of all barns have radios.)

Does multiple set ownership increase the amount of listening done in the home?

To learn the answers, the Iowa survey placed particular emphasis on this phase of the subject. Findings showed that the number of extra listening hours is in almost direct proportion to the extra number of sets. In homes having four or more, for example, an average of 67.7 percent of the families use two sets simultaneously, daytime. as against 26.4 percent with only two

The average Iowa multiple-set home daily uses sets simultaneously more than four quarter-hours. In 71 percent of the cases, different programs are tuned in. Comments Dr. Whan. "This additional hour of listening . . . represents 'extra listening' not usually measured by radio audience research limited to analysis of use of the 'family set.' It represents a sizable audience which should not be ignored in the future...."

Facts and figures of the lowa survev. reproduced in charts accompanying this article are precise and pointed.

WHO makes specific use of this data. The station consistently points out in its advertising to the trade that it is no longer correct to speak of "radio homes . . . sets make today's audience." And it backs up that statement with figures which show that during the past year, in its area alone, multiple-set ownership has increased to the extent that radio advertising costs 52 percent less per thousand radio home sets than in 1944.

Further. WHO makes its findings available to other stations and interested parties as a public service for the benefit of the entire industry. This. too, is a healthful development, and one which is spreading. (Several station and network surveys on multipleset ownership are currently under active consideration. Discussion of them would be premature, but sponsor will follow their progress as part of a continuing study.)

An A. C. Nielson study conducted in 1948 also concerned itself with a comparison of listening between singleset and two-set homes. The survey chronicled listening from 18 January through 24 in all Nielson Radio Index

WSBT COVERS IT ALL

South Bend is one of the biggest, richest, and most responsive markets in America. Its heart is two adjoining cities - South Bend and Mishawaka - with a combined population of 157,000. The entire South Bend market contains more than half-a-million people. In 1948, retail sales were over half-a-billion dollars!

WSBT - and only WSBT - gives you thorough coverage of this great market. Plus this, the rest of WSBT's primary area gives you an additional million people whose retail purchases in 1948 amounted to \$911 million...

You need the South Bend market. You get it - all of it - only with WSBT.

When is a dot not a dot?

Look carefully at the pictures on this page, to see how television creates an image

No. 2 in a series outlining high points in television history

Photos from the historical collection of RCA

As parlor magicians say: "The hand is quicker than the eye!" But modernize the statement so that it becomes: Television magic is quicker than the eye—and that's why you see a photographic image in motion . . . where actually there is only a series of moving dots!

To explain this to laymen, ask them to examine a newspaper picture through a magnifying glass.

Surprisingly, few people know that newspaper pictures are masses of tiny dots "mixed" by the eye to make an image. Even fewer know

that the same principle creates a television picture . . . and, when picture after picture comes in rapid succession, the eye sees motion.

Devising a successful way to "scan" an image—to break it into dots which could be transmitted as electrical impulses—was one of television's first basic problems. Most of the methods dreamed up were mechanical, since electronics was then a baby science. You may remember some of the crude results transmitted mechanically.

Television as we now know it, brilliant images on home receivers, begins with the invention of the *iconoscope* tube by Dr. V. K. Zworykin of RCA Laboratories. First all-electronic "cye" of the television camera, this amazing tube seans an image—"sees" it even in very dim light—translates it into thousands of electrical impulses which are telecast, received,

Felix the Cut was the "stand-in" when this 60-line image was made *mechanically* in tests at NBC's first experimental television station.

Improved definition is obvious to anyone in this all-electronic 120-line image of Felix—transmitted in the early days of NBC television.

By increasing the number of scanning lines to 441 lines in each picture frame, RCA scientists gave us a sharper, clearer television image.

And here you see the deep blacks, clear whites, and subtle halftones as transmitted by NBC with our present 525-line scanning system.

and re-created as sharp, clear pictures in black-and-white—on the phosphorescent screens of today's home television receivers.

And, just as the first flickering "30-line" pictures—produced mechanically—eventually became our present sharp 525-line images, so the iconoscope itself was improved until it became today's supersensitive RCA image orthicon television camera. All-electronic, the image orthicon peers deep into shadows, needs only the light of a candle to see and transmit dramatic action.

But every single television development made by scientists at RCA Laboratories depends, in the end, on a basic physiological fact: When the human eye sees a series of swift-moving dots on a television screen, it automatically "mixes" them into a moving photographic image!

Radio Corporation of America WORLD LEADER IN RADIO—FIRST IN TELEVISION

NORTH CAROLINA

"Maurice. Hot Rod Hulbert, another of many good reasons why WDIA's specialized Negro programming* is 'the sensation of the nation'. Hulbert's 'Tan Town Jubilee', 8-9 AM Mon.-Sat., took 43% share of audience per Hooper. Oct.-Nov. 1949. Participations now available in this same sepia star's great show. 'Sweet Talkin' Time. 11-12 AM Mon.-Sat. Find out how WDIA does a real job for such advertisers as Calumet Baking Powder.

*Metropolitan Memphis Retail Sales

WDIA, Memphis, Tennessee, Bert Ferguson, Mugr., Harold Walker, Com'l Mugr., John E. Pearson, Rep." homes.

Prior to 10 a.m., radio usage is lower among multiple set homes. This, Vielson believes, possibly reflects the later-rising tendency in the more selective economic group. By 10 o'clock, 26.5 percent of single set homes were turned on; 27.3 percent of multiple sets. From then until 11 p.m., multiple listening occurred with progressive hourly increases with the exception of 1 p.m. and 4 p.m. Multiple-set listening was heaviest at 8 p.m., with a dual audience of 55 percent as compared with 46.3 percent for the single receivers.

Nielson attributes the increased evening listening to three factors: 1) bigger families interested in a variety of programs broadcast at the same time: 2) more of the family at home; and 3) accessibility to radio when not in the living room (accounting, also, for peak listening in the kitchen during the daytime, bedroom listening late in the evening).

On a biannual basis, C. E. Hooper does a diary survey of some 4.800 families. In the winter of 1948, the average home, according to the Hooper survey, possessed 1.34 sets; in the spring of 1949, the average had risen to 1.85 percent.

Radio set manufacturers must be given a generous measure of credit for the increase in multiple-set ownership. By improving quality and reducing costs, they have taken extra sets out of the luxury class. Junior's request for his own set for Christmas no longer causes budget-minded parents to slundder.

Aiding and abetting the manufacturers efforts towards greater multipleset ownership is the broadcasting industry itself. The hard-hitting teamwork of NAB and RMA, led by Westinghouse Radio Station's W. B. McGill, is responsible for an annual radio week. The slogan, "A Radio in Every Room- A Radio for Everyone, Everywhere," gets realistic support from a barrage of programs and announcements on hundreds of stations throughout the country. Last year, 30 October through 5 November, more than 500 newspapers participated with ads furnished by NAB and RMA.

The RMA furnishes mats and informative material on a year-round Big I basis, and wide-awake dealers are taking advantage of it for local sales to addrives. The payoff of such cooperative of it.

efforts is shown in the new high in set production chalked up in 1949, and reported by RMA: 5,000,000 sets manufactured by RMA member companies: 3.000,000 by non-members. Christmas sales records were generally cracked in 1949. Today buyers are not emphasizing primary sets.

Plans are now underway in Cleveland, spearheaded by WGAR's general manager, John Patt, for a big promotion of "A Radio in Every Room." Cleveland broadcasters have offered to cooperate with the Electrical League for a campaign based on this theme. The date, tentatively set for the last two weeks in April, hinges on whether enough merchandise is available, and if major set manufacturers will divert a large shipment of sets to the local distributors.

Carl George, president of the Ohio Association of Broadcasters, will alert other stations throughout the State to tie in with the compaign. All eight Cleveland AM stations plan support.

Strong believers in "A Radio in Every Room — A Radio Everywhere, for Everyone" are Sam and Lillian Ulrich (five of their 10 radio sets are pictured on pages 22-23). No matter where an Ulrich may happen to be in their Jamaica. Long Island, home, a radio is never far away.

When asked how he happened to accumulate 10 sets. Mr. Ulrich said this:

"Some years ago I bought one or two sets, and have been buying them off and on ever since—one in one year, another in some other year. I might have been attracted to a new model by its appearance, or its tone, or perhaps to its new features. Whatever the reason, I bought . . . including one television set. I never disposed of a set once it was in my home; just put it in another room when the new set arrived."

Today every room in the Ulrich home has its own radio, plus one portable for the children. The Ulrich family has gone further than most, but everywhere the trend towards many radios in a home is growing rapidly.

With advertisers alerted to the importance of multiple sets in the average home, the future looks decidedly brighter for radio. Multiple-set ownership, like out-of-home listening, is a Big Plus not previously counted. Radio's future is linked with its ability to accurately count its audience—all of it.

THE D.J.'S RESPONSIBILITY

(Continued from page 31)

without subsidies from specially interested parties. But there is ample evidence that many d.j.'s through lack of proper supervision are allowed wittingly or unwittingly to short-change the listener. That in the long run shortchanges the sponsor.

One of the unwitting ways in which lack of program control prevents the best d.j. programing in the sponsor's interest has to do with the concept of building a musical program. The program manager of a leading station manager had merely duplicated.

once went to his d.j. with 13 weeks of programs outlined in advance. He with a conscious purpose, and too few wanted to let the sales manager know specifically what he was trying to sell-

had no regular format for his show, that he would fall flat on his face if he attempted to follow the format The latter showed the d.j. how he had analyzed the jockey's own log for several months. Without realizing it, the d.j. had followed a very definite (and very good) pattern, which the program

Most record programs aren't built such programs stumble into as successful a format as did the one cited above. Some program managers have built The d.j. protested vigorously that he very bad shows (music and otherwise) and many d.j.'s have built consistently good music sessions. The basic reason why a representative of station worked out by the program manager, management should know what's going on in his record shows is to check abuses, intended or unintended, like those already cited.

> But there is another very positive reason: it enables planning for better shows than is usually possible for the average d.j. who has inherited the current tradition. This tradition is more notable for what it does not include than for its positive elements. It is a truism that no program can please everybody. It is then highly important that a music show, no less than any other show, have a clearly and carefully defined format.

This will allow slanting to a predetermined group known to like a specific format and content. Any canny

Out here in Kansas, herds of dairy and beef cattle mean big profits. The farmers who raise these herds prefer WIBW to any other station.

Dr. F. L. Whan's statewide interviews analyzing the Kansas Radio Audience for 1949, show WIBW the outstanding favorite in farm homes. WIBW led its nearest competitor by a 3 to 1 margin.

It's so easy to make your product first choice among these prosperous Kansas families. Just use the station that's their first choice-WIBW.

So pine not for for Pine Knot; instead go with the grain in Kentneky — with WAVE!

program man knows how to go about finding out what his listeners like. Here is the place the commercial manager should be brought into the picture. He knows the kind of people his clients or prospects want to reach.

It is a mistake to believe that people who like operatic and symphonic music like nothing else, or that devotees of pop tunes never listen to anything heavier.

There are tricks to building music programs just as to putting together a comedy show. One of the tricks concerns the relation and proportion of talk to music. Several stations have been experimenting in recent months with a format which concentrates on building the musical mood rather than breaking it up with irrelevant chatter.

They report that this technique seems to make the commercial stand out much more impressively. Coincidental ratings have soared. The stations referred to had previously allowed their very successful d.j.'s to play music as they fancied it, with the typical in between chatter. The idea for experimentation came after the station managers and commercial managers decided to take a hand in program strategy.

Musical appetites change — both in communities as a whole, and within groups in the community. By himself, the average d.j. is not prone to follow these changes quickly. This is another reason why management must fulfill its program responsibility by keeping informed on changing listening habits. Astute program people know that requests alone are no true measure of music desired even by a single segment of listeners. Although this makes for easy programing, it by no means guarantees the best listening.

If the d.j. conscientiously selects music based upon the best information he can get about the listeners he wants to reach, he'll do right by his sponsors. And have many more of them. * * *

STEEL MELTS THE PUBLIC

(Continued from page 25)

a desire to win good will."

The Pittsburgh sports editor put his finger on the nub of it. U. S. Steel is interested less in Aunt Edna's bathtub than in Aunt Edna herself—how she feels about the corporation. More than a half-million persons have a direct stake in U. S. Steel—280,000 em-

MUTUAL SYSTEM

Adam J. Young, Jr., Inc. National Rep. ployees and more than 225,000 stockholders broadcast to brief, interesting commentaries on its operations and the ae-

USS alone produces one-third of the nation's steel supply. (The corporation's gross income in '49 was \$2.302,-443,094.) To any organization of this size and scope, public opinion is infinitely more than a handy phrase. In a labor crisis, for example, it can be all-important. It might conceivably also color the attitude of the Federal Government, which shows signs of increasing restiveness about Big Business in general.

Irving Olds capsules U. S. Steel's slant on radio this way: "USS has devoted a portion of each full-hour

taries on its operations and the aecomplishments of its more than 280,-000 men and women employes. These weekly messages have been accorded high praise in many quarters for the variety of their thenies and the sincere. straightforward manner in which they are presented. Through them, USS feels that it has been able to ereate a better general understanding of its affairs and policies. Furthermore, the messages have served to bring about a greater appreciation of the part played by USS and other American industries in the nation's economv."

Commercial Manager EDWARD PETRY & CO

National Representative

50,000 WATTS

HARRY STONE

IRVING WAUGH

Along with its higher aspirations for its own and the nation's economy, USS is of course concerned with selling steel. But the closest approach to direct selling on *Theatre Guild* is an effort at creating a brand consciousness about USS products.

This takes the form of an occasional line or two like these in a commercial: "When you buy anything made of steel for your home, look for the USS label. Remember—that symbol. USS, is your assurance that the steel is good." The effectiveness of such comparative underselling was shown in a sponsor identification survey made for U. S. Steel in November by C. E. Hooper. A total of 51.4 percent of the group sampled were able to identify Theatre Guild with U. S. Steel—substantially above the figure of 40.3 percent for the average evening program.

A number of the radio commercials have highlighted the activities of individual U. S. Steel subsidiaries, such as Cyclone Fence Div., American Bridge Co., and others. Taken as a whole, the *Theatre Guild* commercials themselves and the way they are handled are well worth close analysis.

You can't catch a mermaid with grubworms. And you can't land your full share of profits in the booming Central South market unless WSM carries your advertising.

With radio stations everywhere WSM remains unique in its ability to reach—to sell an area. Two of the reasons: 50,000 watt 1-A Clear Channel power... production facilities and a staff of 200 entertainers programming local originations to hold an audience of highly specialized radio tastes.

Successful advertisers know—you land the Central South's most desirable sales-fish by using WSM.

U. S. Steel commercials have been read by George Hicks, "U. S. Steel's radio reporter." Hicks is a veteran broadcaster whose distinguished radio reports for ABC from overscas during the war won him a lasting reputation and a Pulitzer prize.

On D-Day in Normandy. Hicks described an enemy aerial attack on the ship from which he was broadcasting with such utter detachment that he might have been telephoning a friend to confirm a lunch date. The same delivery of the Theatre Guild commercials. In a quiet, almost apologetic voice, he "throws them away" in masterly style. Hicks actually gets stacks of fan letters each week from listeners expressing their gratitude for commermercials that soothe rather than flail.

USS shrewdly capitalizes on Hicks' strong personal following by angling the commercials from a first-person viewpoint. Thus Hicks murmured diffidently on a recent broadcast: "Tonight we want you to meet the owners of the U. S. Steel Corporationthe people whose invested savings provide the essential tools of production and make possible the employment of

1945

The decision on the type of radio show grew out of conferences between Carlisle MacDonald and other USS officials and the corporation's agency. Batten, Barton, Durstine and Osborne, It was decided that there was a vacant niche in radio for a top-drawer dramatic program—as distinguished from the daytime serials and the Hollywood air opuses heavily freighted with big names and little else.

The program's association with the Theatre Guild, it was felt, would strike a high prestige note at the outset. The Guild, under Lawrenee Langner and Theresa Helburn, has long been synonymous with the best offerings of the American theatre. An agreement was reached whereby the Guild would appoint a special staff to handle all matters of production and direction for Theatre Guild on the Air, under the general supervision of Langner and Miss Helburn.

The show is budgeted at \$12,500 weekly for talent, and \$20,255 weekly for time, on a 39-week basis. The first radio play, "Wings Over Europe," went on the air over ABC on Sept. 9, 1945, from 10 to 11 p.m. Productions of "Jacobowsky and the Colonel," "John Ferguson" and "The Guardsmen" were given on succeeding Sunday nights.

It was thought at first that the show could build a solid rating by presenting expert adaptations of proven plays of the legitimate theatre, without undue emphasis of big marquee names. The competition of other network shows with entertainers of star caliber proved too tough, however. After the first season Theater Guild on the Air blossomed out with stars as glittering as anybody's—Charles Laughton, Judith Anderson, Burgess Meredith, Maurice Evans, Bert Lahr, James Cagney, the Lunts and Betty Field, among many others.

In May, 1946. Theatre Guild gave way to a summer replacement for USS Hour of Mystery. Maedonald felt that the show's rating had not fattened enough to be hurt appreciably by a hiatus. Still he deemed it wise to maintain contact with the listening audience during the summer months, and decided that a low-budget replacement was the answer.

When Theatre Guild returned to the air for its second season in September, 1946, a survey by A. C. Neilsen for USS showed that the program had

picked up nearly two million additional listeners—5,551.224 against 3,011,850 during its first year. (At the beginning of the current season Neilsen estimated the show's audience at 10,575,-710. See chart.)

At the start of the 1947 season Theatre Guild moved from its original time period of 10 to 11 p.m. into the 9.30-10.30 p.m. slot on ABC. U. S. Steel was happy about the move on two counts—the obvious advantages of the earlier scheduling, and the proximity to Walter Winchell, whose 9 o'clock news show exerts a strong listener pull felt by all his network neighbors.

It was around this time that both NBC and CBS began ardent courtships designed to lure USS and its lush billings away from ABC. USS emphasizes that it was very happy with the latter network, but admits there was a desire for a bigger audience. NBC and CBS bore down heavily on that point. NBC. which offered the 8.30-9.30 slot on Sunday night, got the nod. USS felt the time was just about ideal, and was also anxious to continue the show's Sunday night tradition.

As a further clincher, NBC played a trump card—a 13-week summer series of broadcasts by the NBC Symphony, featuring guest conductors. USS decided that the potent audience pull of such a program would more than offset the normal summer listening slump.

The last three weeks' commercials of the NBC Symphony series reminded listeners that *Theatre Guild* would be back on the air at a new time and on a new network, come September. Since the start of this season the shows have originated from NBC's Belasco Theatre studio, in the heart of the Broadway theatre district.

USS has given its radio show strong promotional support ever since its inception and the networks have followed through on their end. Each fall Theatre Guild's return to the air is heralded by large newspaper ads in cities across the country. Smaller ads on the radio page or elsewhere are selieduled each Sunday. NBC meanwhile schedules dozens of transcribed and live "coming attraction" spots starting each Thursday and increasing in frequency until shortly before the show begins on Sunday night. The transcriptions are customarily cut by the stars themselves during rehearsals.

Additionally, for productions it con-

HOW? COVERAGE -50,000 power-full watts serving 16 cicies with a metropolitan population of 1 million, 247 thousand. This 16 city area alone ean claim retail sales of 1 billion, 162 million, 225 thousand dollars. A Hooper Survey just completed proves that WGY reaches 55% more evening radio listeners in the 16 markets than the next best station.

WHY? WGY is the only clear channel station serving the area...50,000 watts power on a low frequency!

WGY has been a listening habit since 1922!

WGY is the ONLY NBC station in the area. Other network audienees are divided among: 3 stations for CBS, 5 stations for ABC, 6 stations for MBS.

WGY is owned and operated by the General Electric Company, thus assuring finest station operation in the area.

WHEN? . . . RIGHT NOW if your product is distributed in upstate New York and Western New England. Your message on WGY will assure you of domination of the listening audience in the area, because WGY provides:

More Markets than any other upstate New York

larger Audiences than any other station in the area. Wider Coverage than any other station in the area. lower Cost than any combination of stations in the area to reach the 16 markets.

Represented Nationally by NBC Spat Sales

For the complete story on WGY, its programs and availabilities, call your nearest NBC Spot Salesman!

To insure the appearance of a lady deep-sea diver or a sky writer, a staff assistant makes a number of phone calls at random to those in the know in such fields and asks them to send over some likely candidates for the

Groucho an opportunity to ad lib and twit the contestants before they start the quiz portion of the program which antics.

All the kidding is in good taste. People.

Those in the audience are made to feel that they're part of the show. Even though the contestant may be a target of the Marx wit, he knows it's being done good-naturedly. He is being treated as "one of the boys." so to

It all adds up to entertainment, fun Such diverse occupations give for all, and good will for sponsor, product, and program.

Gulf Oil and General Foods noted is, actually, secondary to the Marx these important ingredients when they undertook the sponsorship of We The

Now a Gulf Oil simulcast, it has for 13 years featured just plain people. Sinee June. 1948, it has become a simultaneous digger into the past and a teller of the news as it occurs.

Gulf Oil sponsored the program on CBS from April 26, 1942, to October 25, 1949. continued its sponsorship when the show moved to NBC. General Foods was the sponsor from 1936 to 1942.

Currently in the public eye is Noah Rondeau, a hermit from up-state New York who is also distinguished as the only man who has ever been permitted to ad lib on We The People. Noah hides out in a Catskill cave during the summer months and hibernates during the snowy season in the woods near Saratoga. He has made three appearances on We The People and has ad libbed quite successfully each time. He'll be back for a fourth try soon. Other less individualistic guests on We The People are required to memorize versions which have been written

for them. M.C. Dan Seymour is an expert at prompting guests who forget lines. He keeps the show moving, helps make speeches seem natural.

On the sport scene, WMCM's spontaneous Marty Glickman gives the audience and the sponsor a break.

Listeners to Glickman's basketball reporting get a vivid play-by-play account of the game with the commercials painlessly but profitably (for the sponsor) inserted so as not to impede the court action.

Listeners are happy because the action isn't interrupted by an ill-timed blurb. Sponsors are pleased because they know that when Marty delivers his sales talk, the listener will be receptive since it is tactfully delivered.

When a team scores, Marty notes that the shot is good — good like Vedicks. Or a player may score and the word hit is used. A player "hits" —and "Adler Shoes are a hit, too."

One commercial that was particularly successful last year was the phrasing of a successful shot at the basket as being good as gold—an Old Gold.

Many of the commercials at a college game bring in the college style angle. "These college boys at tonight's game are style leaders and many of them wear Adler Shoes, style leaders in their field."

Buddy Lee gets into the basketball game via this introduction: "He scores like a Buddy Lee suit—the suit that gives you style and class."

KMBC-KFRM (Kansas City. Missouri) and WRVA (Richmond. Virginia) have also found ways to please the audience and the sponsor at the same time.

The Brush Creek Follies, one of the Midwest's biggest stage shows, is now in its 14th year. Twice this fall attendance records have been broken at the combination radio-stage appearance of the Saturday night Follies with attendance averaging more than 2,000 per performance.

Each act on the two-hour program prepares an outline in advance of the show. The master of ceremonies also has his own outline. But, from beginning to end, the show's spontaneous with no script except for the commercials.

WRVA's Calling All Cooks has a quiz-type program where contestants

Baltimore Television means WMAR-TV

As Maryland's pioneer television station, WMAR-TV consistently covers an area from Washington, P. C. to Wilmington, Delaware, and from Pennsylvania to the Potomac River.

WMAR-TV is the television station of the Sunpapers of Baltimore. It is on Channel Two, and carries the programs of the CBS network to televiewers in the entire Chesapeake basin area.

WMAR-TV's coverage of political campaigns, sports and special events—civie, patriotic, and cultural—is unequaled in this rich, productive area.

NEW YORK JUST ISN'T WORTH IT

Illness Is Very Expensive, Too

An advertising agency outside of Gotham can undoubtedly use, perhaps as account executive, a man*, who during his 43 years, has directed buying of network and spot time and programs, managed a newspaper representative office and sold time and space.

He has also written magazine and newspaper articles, radio scripts and commercials and promotion material. Valuable time has been lost but there are many, many productive years ahead.

SPONSOR, BOX 11

Horton Mallinson

give the commercials on an *ad lib* basis. Each contestant chooses a product being advertised on the show. This makes the commercial sound more convincing since it comes from a member of the audience.

WRVV's program service manager. Sam Carey, says: "We have not yet had a bad one." At the conclusion of these unprepared comments, the announcer goes into his prepared commercial.

This method helps to get away from the run-of-the-mill interviewing that slows down most shows and, at the same time, it is more valuable as a completely spontaneous testimonial for the chosen product.

The Duz program. Truth or Consequences reverses the spontaneity procedure by letting the studio and home audience in on the gags but springing the surprise on the contestants.

The Duz people are well pleased with their spontaneity approach. They've sponsored the Ralph Edwards show since August 17, 1940, when the program came to NBC from CBS.

Stunts on the zany Duz program are planned and thought out by Ralph Edwards and a staff of five men.

Although the andience is told what's up, the contestants never know what will happen next, and it is this unknowing spontaneity on their part which adds to the zest of the program.

Two recent unsuspecting contestants have been pledged to race each other via pogo stick and airplane.

An old-timer, It Pays To Be Ignorant, showed that it helps to be spontaneous as well—provided your spontaneity is planned. From 1944 to 1948, intermittently. Philip Morris bankrolled the program.

While gags and half-witticisms were bandied back and forth with apparent casualness, the major portion of the program was actually scripted. From February, 1948, to February, 1949, the program was aired on a cooperative basis with Tom Howard, George Shelton, Lulu McConnell, and Harry MeNaughton continuing on their way via planned buffoonery.

These and scores of other successful programs have proven it doesn't pay to be ignorant about an important part of radio programing—planned spontaneity. It's a time-proven formula that can be profitable for agencies and sponsors.

"26" COFFEE

(Continued from page 29)

conventional approach, perhaps, but again it illustrates the directness of the company's thinking.

It was direct thinking that put Isbrandtsen into the coffee business. Isbrandtsen vessels had been carrying green coffee as part of their cargoes for many years, and delivering it to coffee importers in the U.S. All they had to do was to set up a roasting and packinging plant of their own and they were in business-with a decided advantage over competitors because of the huge saving on shipping charges.

A total of \$55,000 was earmarked for advertising "26" Coffee the first year, with \$20,000 devoted to radio. With the aid of its advertising agency, Cowan & Dengler, New York, the Isbrandtsen company set into operation the "Grocer Participation Plan." The plan is simple in its essence and yet works so effectively that it is well worth describing in detail.

The local station starts the ball rolling by sending to grocers on a prepared mailing list a form letter prepared by the agency for "26." Here, for example, is the one sent out by WNBF. Binghamton, N. Y., on Sept. 19:

Dear Mr. Grocer:

Do you enjoy coffee, America's national beverage? Do you appreciate good coffee? Whether your answer is 'yes" or "no." here's how you can advertise YOUR store as GOOD coffee headquarters at no cost to you.

Starting Monday, Sept. 26, continuing on for two and three times a day

12 times a week—radio station WNBF will advertise that delicious Isbrandtsen "26" Coffee over the air with hard-hitting radio announcements Cities and surrounding areas. Here's where you cash in: the "26" Coffee people are going to advertise over Station WNBF the names and addresses of grocers who handle "26" Coffee. That means you, Mr. Dealer, and your store, will be mentioned by name and

will be advised by postcard in advance of YOUR BROADCAST so you and all your customers can hear your radio announcement.

That, very briefly, Mr. Dealer, is what "26" Coffee is going to do to help grocers in the Triple Cities and beyond who cooperate with this distinctly different "26" Coffee advertising campaign. When the "26" Coffee salesman stops in to see you. he'll outline exactly how you can have announcements for YOUR own store on the air over WNBF. Please give him your attention when he calls on you. He has a very profitable deal for you.

> Cordially yours. E. RAY McCloskey, Promotion manager WNBF, Binghamton, N. Y.

The initial test of this plan, according to the Isbrandtsen company, "sold more coffee by radio in 30 days than had been sold in the test markets by newspapers in 12 months."

The letter reprinted above is followed by a series of four or more teaser postcards (such as the ones shown) which nibble away at the idea —"Why not advertise your store as good coffee headquarters-free? Ask the United Wholesale Grocery Co. salesman (followed by the jobber's address and phone number).

After a grocer has agreed to stock "26" Coffee in conjunction with the radio merchandising plan, the local "26" jobber sends him a postcard notification of the day and time his store will be featured in a "26" Coffee commercial on the local station, and adds this reminder: "Be sure to have a prominent counter or window display (of "26" Coffee) and cash in on this efthat are loaded with a new and unique fective advertising. Don't forget to selling message about "26" Coffee tune in and hear the announcement and about leading grocers in the Triple that (the jobber) has arranged for your benefit."

Then comes the clincher: participating grocers are asked to sign a waiver authorizing the use of their name in a first-person commercial featuring their

These spots are done on the air with address on the air over WNBF. You two voices of contrasting levels, one

an announcer impersonating a grocer, venience these operations are listed. Here is a sample:

Announcer: "Knowing when to advise a customer is a might important thing. Some customers like it, and some don't. The genial proprietor of (name of grocery) at (address) puts it this way:

Grocer: "If you walk into my store you'll see seven brands of coffee. Six of them are for customers who haven't asked for my advice. The seventh brand is '26' Coffee, and that's the one I sell to customers who ask me which brand is best. I don't give advice where it isn't wanted, but if you haven't tried Isbrandtsen's '26' Coffee, you've missed the best coffee money can buy."

To make doubly sure that the grocer participation plan works smoothly, the Isbrandtsen agency sends participating stations a seven-point check list pinning down the operation step-bystep. It reads as follows:

"This station is launching an announcement campaign for "26" Coffee. The plan to be used embodies some special twists which have been unusually successful when applied by other media but which are compara-

the regular announcer and the other tively new to radio. . . . For your con-

- 1. Provide Porter F. Leach, care of Cowan & Dengler, 527 Fifth Ave., the advertising agency in New York, with a retail groeers' list applicable to your coverage area.
- 2. Prepare and send our announcement letter and a government penny postcard to retail grocery prospect list announcing the "26" Coffee radio advertising plan (postcard plate furnished by client).
- 3. Contact the "26" Coffee jobber (his name and address) at regular intervals to be sure that he keeps forwarding lists as fast as his salesmen make new placements.

4. Each Friday, assign an imprint (grocer's permission to use his name) to each announcement to be broadcast during the following week. (Suggest mimeographing imprint forms to be filled in and tipped on to the copy page by rubber cement.)

5. Furnish local "26" Coffee jobber each Friday with a typewritten list of the announcement times and the iniprints which will be used at each of the times for the following week, suggesting that he post the list at the loading platform or where his driver salesmen can note information regarding imprints of their own retail grocery customers and carry a copy with them.

6. Phone local grocers, and address mail notification postcards to out-oftown individual grocers three days in advance with notification that his announcements will be broadcast at a specified time. . . .'

The Isbrandtsen company intends to use the same plan for its new products -"26" Tea, which has just been introduced, and "26" Chocolate Syrup. to be introduced this spring. Radio. of course, will carry the ball for both. as it has done so spectacularly for "26" Coffee. As for television, Isbrandtsen is already using participations on WBEN. Buffalo for "26" Coffee, and probably will do the same in New Ha-

From a distribution standpoint, the company's coverage thus far does not extend beyond the East and New England. But with radio as a springboard. the "26" label before long may reach more distant market areas. For in the coffee business as on the high seasas Hans Isbrandtsen has pointed out rather sharply to Dean Acheson the name "Isbrandtsen" stands for energy. initiative, and resourcefulness. **

Medium with a plus

Radio, the medium that was supposedly teetering on the ropes several months ago, is now back in the admedia picture with a wallop.

Matter of fact, it's back with a double wallop.

For radio, unaware of its strength for many a year, finds in out-of-home listening and multiple-sets-in-the-home a two-fisted barrage that is winning the respect of hard-headed advertisers.

Radio is only now starting to assess what it has. It finds that out-of-home listening boosts its audience substantially, sometimes as high as 25 percent beyond the regulation tallies. Multiple sets in the home, and resultant individual ad impressions, suggest that before long the standard unit of radio measurement will shift from the home to the individual. There are immmerable more sets, and listeners, than homes.

Printed media learned to count long ago. In recent years their ability to

count their readers reached a fine art. More important, they sold advertisers on accepting a count that included every last copy in every last location . . . and in many cases on a projected reader basis. Printed media rates have been based on a count of every last issue.

Radio rates are based on *homes*. When the full count is in, advertisers will see that, despite the inroads of television in many markets, radio is a bargain medium.

Because of its previous inability to count, radio today presents a bonafide argument for securing more of the advertiser's dollar than ever before.

The healthier rating picture

For a half million dollars, more or less, C. E. Hooper has sold his U. S. Hooperatings, Program Hooperatings, Pacific Program Hooperatings, and TV Network Hooperatings to A. C. Nielsen.

Today the national radio and TV program rating picture is clearer. For the first time in many years the national advertiser and his advertising agency will be able to make decisions on the basis of a single yardstick rather than on two that don't measure the same way or give the same answers.

The economics of present-day radio induced Hooper to sell his national interests and concentrate on his local ones. He found a willing buyer in Art Nielsen, who had made no secret of his intense desire to dominate the national scene. The diminishing network radio market couldn't continue to support both.

But there was another reason why Hooper cheerfully abdicated the network scene. For the past year his public utterances have left no doubt that TV is his oyster. He would have preferred to have continued his TV Network Hooperatings, but Nielsen would have none of that. Hooper will become increasingly active in the TV markets, although for some time to come his radio City Hooperatings will constitute his basic income.

With 2.000 audimeters located in 1.500 homes spotted strategically throughout the United States (except the Mountain Time Zone), Nielsen feels he is in an advantageous position to render a scientifically accurate rating. He has no plans to increase his sample, but he is speeding up delivery with a new-type "Mailable Audimeter." Two-week service of the New York TV sample has been achieved through use of the new instruments.

Nielsen will not desert the local field. which he is only serving sparsely; but Hooper will not again enter the national one. So the changing times eliminates one of broadcast advertising's most annoying problems. Henceforth national sponsors should find it easier to evaluate and use the air media.

Only fools predict

Our "stick-our-neck-out" department makes this prediction.

By the end of March the much reviled (before being shown) industry film, LIGHTNING THAT TALKS, will be fervently sought for gala, club, and station showings throughout the U. S.

By the end of March stations taken in by the antifilm propaganda (and who thereby cancelled their priorities) will be scrambling for dates again.

By the end of March you'll know how accurately sponsor prognosticates.

Applause

Tools for the trade

This is our thanks to an industry which, out of necessity but also out of initiative, provides sponsor with the ingredients for an NAB issue right down the "dollars-and-cents" alley.

sponsor's 1950 NAB issue will be devoted to a summary of all the tools provided by sellers of broadcast advertising to help advertisers and agencies evaluate and profitably use the air media

Until this year sponsor never felt that such a compilation would have sufficient meaning to warrant publication.

The 1950 picture is different.

Today the BAB, BMB, national representatives, transcription companies, rating services, library services, news services, research organizations, networks, and trade magazines (plus many more) are offering aids to the radio and TV advertiser in quantity and quality.

The keen awareness of broadcast advertising that it must fight for its dollars has brought this about.

Thus, sponsor's NAB issue has significance tuned to the concept around which sponsor is published: to help the broadcast advertiser get the most for his money; to encourage him to more fully and effectively use broadcast advertising.

sponsor's NAB issue will be dated 10 April.

THE KANSAS CITY TRADE AREA

Does Not Run in Circles!

Accepted studies show Kansas City's Primary Trade area to be rectangular, as illustrated. Kansas City is the natural capital for all trade and commerce in this vast territory.

and commerce in this vast territory.

The KMBC-KFRM Team has been custom-built to serve this area—without waste circulation!

The KMBC-KFRM Team is your best buy in the Heart of America because it provides complete, effective and economical coverage. Contact KMBC-KFRM or any Free & Peters' "Colonel" for complete details.
